

SYNOPSIS

TRANSIT FEASIBILITY STUDY

One of Council's strategic initiatives is to determine the feasibility of a transit within the Town. A transit system would foster safe and accessible options for movement within the town, and provide a service that reduces barriers and makes Amherst accessible and equitable to all, which are two of Council's priority outcomes.

In order to receive funding from senior levels of government, a motion of Council approving this project is needed. If successful, our grant application could fund 100% of the study.

MOTION:

That Council approve a transit feasibility for the Town of Amherst.
