

External Committee Report

Northern Region Waste-Resource

June 2019

The regular meeting of the Northern Region Waste-Resource Committee was held on June 14th in Elmsdale. Items on the agenda included updates from the Regional Chairs and Regional Coordinator as well as the Managers/Directors Committee.

Regional Chairs submitted the EPR proposal to the Minister of the Environment on May 31. Chairs then issued a press release one week later, which included the proposal to draw public attention to the issue of EPR in the province. Staff understand that no consideration of EPR will be made until the Efficiency Study is completed. The final draft of the Study is expected in mid-late July.

The next general meeting is scheduled for Friday, September 27th hosted in Cumberland with location to be determined.
